recognition of said feature;

an intelligent controller having associated therewith a

means for accessing said programming material in

response to receiving said coded signal; and

a display unit for presenting said programming

material.

*323*

169. A system as defined in claim 168 wherein said at least one machine recognizable feature has associated therewith a data link which is recognized by said feature recognition unit.

170. A system as defined in claim 169 wherein said data link comprises an image data link.

171. A system as defined in claim 169 wherein said data link comprises a video data link.

172. A system as defined in claim 169 wherein said data link comprises a programming data link.

173. A system as defined in claim 169 wherein said data link

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

comprises a sound data link.

174. A system as defined in claim 169 wherein said data link comprises an online data link.

175. A system as defined in claim 169 wherein said data link comprises an online shopping data link.

176. A system as defined in claim 169 wherein said data link comprises a pictorial data link.

177. A system as defined in claim 169 wherein said data link comprises an electronic data link.

178. A system as defined in claim 169 wherein said data link comprises an electronic media link.

179. A system as defined in claim 169 wherein said data link comprises an "information superhighway" data link.

180. A system as defined in claim 179 wherein said "information

superhighway" data link comprises the internet.

181. A system as defined in claim 179 wherein said "information superhighway" data link comprises the world wide web.

182. A system as defined in claim 179 wherein said "information superhighway" data link comprises a computer network.

183. A system as defined in claim 179 wherein said "information superhighway" data link comprises an ISDN network.

184. A system as defined in claim 179 wherein said "information superhighway" data link comprises a telephone line.

185. A system as defined in claim 179 wherein said "information superhighway" data link comprises a CATV line.

186. A system as defined in claim 179 wherein said "information superhighway" data link comprises a local area network.

187. A system as defined in claim 179 wherein said "information

superhighway" data link comprises a wide area network.

188. A system as defined in claim 179 wherein said "information superhighway" data link comprises a data communications network.

189. A system as defined in claim 179 wherein said "information superhighway" data link comprises an Internet Product Service Directory.

190. A system as defined in claim 179 wherein said "information superhighway" data link comprises a globally based digital communications network.

191. A system as defined in claim 179 wherein said "information superhighway" data link comprises a wireless network link.

192. A system as defined in claim 179 wherein said "information superhighway" data link comprises a Wireless Application Protocol internet.

193. A system as defined in claim 179 wherein said "information superhighway" data link comprises an ethernet network.
194. A system as defined in claim 179 wherein said "information superhighway" data link comprises a RF cellular network.
195. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a bar code.
196. A system as defined in claim 195 wherein said bar code comprises a Universal Product Code.
197. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an invisible bar code.
198. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a magnetic code.
199. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a printed character.

200. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a symbol.
201. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a pictorial icon.
202. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an invisible indicia.
203. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a two-dimensional figure.
204. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an icon.
205. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an invisible icon.
206. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a watermark.

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

207. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an invisible watermark.

208. A system as defined in claim 207 wherein said invisible watermark comprises a digital watermark.

209. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a series of alphanumeric characters.

210. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a binary code.

211. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a digital watermark.

212. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a magnetic strip.

213. A system as defined in claim 168 wherein said at least one

219. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a hieroglyphic character.
220. A system as defined in claim in 168 wherein said programming material comprises information..
221. A system as defined in claim 220 wherein said information comprises information about an event facility.
222. A system as defined in claim 221 wherein said event facility comprises an arena.
223. A system as defined in claim 221 wherein said event facility comprises a theater.
224. A system as defined in claim 220 wherein said information comprises information about seat location.
225. A system as defined in claim 220 wherein said information comprises seat location illustrations.

# PATENT

227. A system as defined in claim 220 wherein said information comprises traveling directions to said event facility.

229. A system as defined in claim 220 wherein said information comprises event information.

231. A system as defined in claim 220 wherein said information comprises information about the background of an event.

232. A system as defined in claim 220 wherein said information comprises information about the participants of an event.

233. A system as defined in claim 220 wherein said information comprises information about sponsors of an event.
234. A system as defined in claim 220 wherein said information comprises information about promoters of an event.
235. A system as defined in claim 220 wherein said information comprises reviews of an event.
236. A system as defined in claim in 168 wherein said programming material comprises a service.
237. A system as defined in claim 236 wherein said service includes displaying promotional programming on said display unit of said user.
238. A system as defined in claim 236 wherein said service includes establishing a communication link with said user.
239. A system as defined in claim 238 wherein said communication link includes conducting an interaction with said user via a

telephone.

240. A system as defined in claim 238 wherein said communication link includes conducting an interaction between a plurality of users via an online communication chat link.

241. A system as defined in claim 238 wherein said communication link comprises purchasing tickets for an event.

242. A system as defined in claim 238 wherein said communication link comprises reserving tickets for an event.

243. A system as defined in claim 238 wherein said communication link comprises an interaction with a fan club member.

244. A system as defined in claim 238 wherein said communication link comprises posting reviews of an event.

245. A system as defined in claim 238 wherein said communication link comprises purchasing memorabilia related to an event.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

246. A system as defined in claim 238 wherein said communication link comprises purchasing event facility merchandise.
247. A system as defined in claim 238 wherein said communication link comprises a promotion to win tickets to an event.
248. A system as defined in claim 168 wherein said display unit comprises a personal computer.
249. A system as defined in claim 250 wherein said personal computer comprises a laptop computer.
250. A system as defined in claim 168 wherein said display unit comprises a television.
251. A system as defined in claim 168 wherein said display unit comprises a device containing a microprocessor.
252. A system as defined in claim 251 wherein said device containing a microprocessor is hand-held.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

253. A system as defined in claim 251 wherein said device containing a microprocessor is portable.
254. A system as defined in claim 168 wherein said display unit comprises a personal digital planner.
255. A system as defined in claim 168 wherein said display unit comprises an internet appliance.
256. A system as defined in claim 168 wherein said display unit comprises a cellular telephone.
257. A system as defined in claim 168 wherein said display unit comprises a wireless communication device.
258. A system as defined in claim 168 wherein said display unit comprises a simulated book.
259. A system as defined in claim 168 wherein said display unit comprises an intelligent terminal.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

260. A system as defined in claim 168 wherein said display unit comprises a web-based television.

261. A system as defined in claim 168 wherein said display unit comprises a pager.

262. A system as defined in claim 168 wherein said display unit comprises an Internet-enabled telephone.

263. A system as defined in claim 168 wherein said recognition unit is selected from a group consisting of a hand-held unit, a scanner, a bar code scanner, an optical code reader, an optical reader, a personal camera, a personal computer reader, a digital camera, a digital mouse and an optical mouse.

264. A system as defined in claim 263 wherein said recognition unit is linked to a personal computer.

265. A system as defined in claim 263 wherein said recognition unit is linked to a wireless interface.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

266. A system as defined in claim 265 wherein said wireless interface comprises a wireless network.

267. A system as defined in claim 266 wherein said wireless network comprises a cellular network.

268. A system as defined in claim 265 wherein said wireless interface comprises a cellular telephone.

269. A system as defined in claim 265 wherein said wireless interface comprises a pager.

270. A system as defined in claim 265 wherein said wireless interface comprises a wireless personal computer.

271. A system as defined in claim 265 wherein said wireless interface comprises a personal digital assistant.

272. A system as defined in claim 263 wherein said recognition unit is linked to a personal digital assistant.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

273. A system as defined in claim 263 wherein said recognition unit is linked to an Internet appliance.

274. A system as defined in claim 263 wherein said recognition unit is linked to a television set.

275. A system as defined in claim 263 wherein said recognition unit comprises a portion of a cellular telephone.

276. A system as defined in claim 263 wherein said recognition unit comprises a portion of a personal digital assistant.

277. A system as defined in claim 263 wherein said recognition unit comprises a portion of a remote control unit.

278. A system as defined in claim 263 wherein said recognition unit comprises a portion of a handwriting implement.

279. A method of providing a user access to programming material, comprising the steps of:

imprinting a machine recognizable feature within a

printed ticket of admission;  
scanning said machine recognizable feature of said  
printed ticket of admission; and  
transmitting data associated with said machine  
recognizable feature via a communication link to  
access said programming material, wherein said  
programming material is related to said printed  
ticket of admission

280. The method of claim 279 wherein said communication link includes the Internet.

281. The method of claim 279 wherein said machine recognizable feature is selected from a group consisting of bar code, universal product code, invisible bar code, magnetic code, printed character, symbol, icon, invisible indicia, two-dimensional figure, icon, invisible icon, watermark, invisible watermark, digital watermark, series of alphanumeric characters, binary code, digital watermark, magnetic strip, code, analog pattern, and hieroglyphic character.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

282. A method of providing a user access to supplemental programming material associated with a printed ticket of admission, comprising the steps of:

imprinting a machine recognizable feature within said printed ticket of admission wherein said machine recognizable feature has associated therewith a command sequence for accessing programming material;

scanning said machine recognizable feature within said printed ticket of admission and downloading data indicative of said machine recognizable feature via the Internet to a remote server;

accessing programming material from said remote server;

and

transmitting said programming material to said user allowing said user to perceive said programming material in a humanly perceivable form, wherein said programming material is related to said printed ticket of admission.

283. The method of claim 282 wherein said programming material

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

comprises multimedia.

284. The method of claim 282 wherein said machine recognizable feature is selected from a group consisting of a bar code, a universal product code, invisible bar code, magnetic code, printed character, symbol, icon, invisible indicia, two-dimensional figure, icon, invisible icon, watermark, invisible watermark, digital watermark, series of alphanumeric characters, binary code, digital watermark, magnetic strip, code, analog pattern, and hieroglyphic character.
